LORENZ docuBridge

Submission Management

Regulatory Document Management

Advanced submission production and management system for compiling, publishing and reviewing

Multi-format publishing:
Publish multiple output formats from a single sequence: eCTD, NeeS, HTML, PDF, paper and more

Interoperability:
Work flawlessly with other LORENZ solutions and third-party softwares

Ad-hoc specification updates:
Receive submission specification updates automatically without re-installing the software

Lifecycle management:
Show current and revised versions of sequences, and which changes have been made. Organize sequences by regulatory activities

Team collaboration:
Work as a team on a single submission sequence with no conflicts

Flexible content reuse:
Replicate the content files, hyperlinks, and node properties set in a source sequence to a lifecycle sequence in target applications

Trusted by industry & agencies

Deployment locally or in the cloud

Scalable from single user to a large enterprise

Which version is perfect for you?
